It's Not A Coach® Bag Without The Coach® Tag

Coach has been making fine quality leather products for 45 years. We are gratified that during this time they have become known as true American classics—straightforward, functional designs that are very well made and never go out of style.

Our Leather

All of our handbags and briefcases are made out of the same leather—a full-grain, natural glove tanned cowhide. We use a special formulation of tanning extracts and emollients that renders this rugged leather soft and supple without detracting from its strength or beauty. We take great care to enhance, rather than conceal, the natural markings that give our leather its special character.

That is why no two Coach bags will ever look the same. And that is why your Coach will actually get better and better, developing its own distinctive patina as it is worn.

Our Registration

Every Coach bag and briefcase is identified at our factory with its own registration number. If it is a genuine Coach, you will find this registration number branded onto the leather on an inside pocket.

Our Distribution

Quality leather goods must be made in small, carefully supervised lots that do not readily lend themselves to mass production. That is why you will find Coach products in only Coach Stores and the very best Department and Specialty stores.

All Coach products can be ordered directly from our factory and sent to you free of any shipping or handling charges. To order call toll free, day or night: (800) 544-3004

Here Are The Classic Bag Fittings That We Make Out Of Coach® Glove Tanned Cowhide

For several years now, we have been producing a small collection of these classic Bag Fittings especially designed to accessorize our bags.

Coach Bag Fittings are made out of the same Glove Tanned Cowhide that we use to make our bags. Like the bags, they respond very well to wear, taking on a rich patina as they are worn.

In order to make these small pieces out of our glove leather, it is necessary to reduce the leather to a lighter weight.

This is accomplished by running each part through a splitting operation that reduces it to the desired thickness and in the pro-

cess, renders it as soft and supple as a piece of fine Calfskin.

With the exception of the Squeeze Keycase, all Coach Bag Fittings are fully lined. The two Make-Up Kits are lined with a water-resistant cotton ticking. The other Bag Fittings are lined with leather. The zippers and snap fasteners are solid brass. The purse frames are covered with leather.

Coach Bag Fittings are available in all ten Coach Colors shown on page two. They can be matched, coordinated or color coded for easy identification.

Belt Sizing

If you are unsure of your exact belt size, it would be wise to check it before ordering. Take a belt that you presently wear and measure the distance from the tip of the buckle to the hole on which you generally wear it. Round this number upward or downward to the nearest even number.

This is your correct belt size. Waist sizes may vary considerably in the course of a single day. Thus, a properly fitted belt should occupy one of the center holes, so as to allow for at least one inch adjustment in either direction.

The Story Of Coach® Water Buffalo Hide Wallets And Accessories

In the forty years or so that we have been making turned-edge wallets, we have never seen a leather so ideally suited to this purpose.

It is thin. It is firm. It has the distinctive temper and "squeak" of vegetable-tanned leather, and the beautiful natural graining of a fine piece of wood, so no two pieces are ever exactly alike.

As the leather is worn, it gradually becomes brighter and more polished, revealing the beautiful natural markings hidden just below the surface.

The tanning method used to give Coach Water Buffalo Hide its special character was probably first developed in small village tanneries in India and is still used there today. For months, the hides are left to soak in tanning pits dug in the ground and filled with specially prepared mixtures of natural tree bark extracts.

Most of this leather becomes sandals, but the best hides—still stiff and uncolored—are baled and shipped overseas.

We select the skins with the most interesting natural markings and soak them for hours in rotating drums filled with our own exclusive formula.

All of our wallets have hand-turned edges that are glued as well as sewn.

When this cycle is complete, the leather is remarkably transformed. What started out as a rough, wrinkled hide is now a smooth, supple, richly grained leather of extraordinary character.
